

Clear Creek Farm Community Supported Agriculture

Adam and Anne Kaszubski

2012 Farmer-Shareholder Agreement

I/We appreciate locally grown, pesticide-free produce and want to ensure that it remains available in Southern Illinois by becoming a shareholder/shareholders in Clear Creek Community Supported Agriculture. I/We understand that the Clear Creek farmer(s) will do their best to provide the sustainably produced vegetable varieties they propose at the times they estimate. However, as a sharer/sharers in both the bounty and the risk, I/we understand that nature ultimately decides what I/we will receive and when I/we will receive it.

Pricing:

The price of a **share is \$350**. This fee includes organizational costs for produce distribution and newsletter. You will receive an average of \$25.00 of produce grown without pesticides or synthetic fertilizers per week during the season, pending normal weather patterns. Payment in full for the price of the share is due prior to April 15th. Cash or check payments only are available at this time.

Produce Pickup:

CCCSA farmers will begin harvesting your produce in May. The first pickup will be the first or second week of May. You will be informed of your exact location prior to the start of the season. Harvest will continue each week throughout the growing season for 22 weeks, until the value of the share is met. Note: The size of your share will resemble a bell curve over the season, with more produce during the height of the season and typically less in the early spring and late fall.

If you cannot pick up your share at the specified time, you can designate others to pick up your share. Simply have them give your name at pickup. Thank you.
